DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a method of turning a medical device, classified in class 606, subclass 1.
- II. Claims 25-56 and 58, drawn to a method of navigation, classified in class 434, subclass 239.
- III. Claim 57, drawn to an algorithm, classified in class 700, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group III and both Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process such as a navigation of a magnet or turning a medical device.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
